

## Donor's Choose Project Description

**Project Description (In a short paragraph describe your project. Use the text from the application):**

In our classroom we have students from low income households and high poverty areas, in doing so they do not have supplies such as ELA workbooks, tablet and or computers at home . I would like to request ELA workbook apps to use on tablets/ computer to enhance the students reading comprehension and word recognition skills. I feel like it would be great to not only enhance the students reading and comprehension, but be able to provide them with literacy apps and worksheets that would keep their attention. These supplies would help each student stay engaged and build their technology skills to enhance their various learning patterns.

our 2nd Graders need tablets or computer to provide them with the skills they need to become the tech savvy leaders of the future.
