## Math Strategies and Ten Frames 1-20

## Geared toward Common Core Standards

Kindergarten, $1^{\text {st }}$ Grade, and $2^{\text {nd }}$ Grade
Contents:

- Ten Frame Page for numbers 1-20
- Page for Math vocabulary (part/Part whole) and (addends and sum)
- Math Strategies Page/Poster
-Zero Strategy
-One more Strategy
- Two More Strategy
oSums of 10 Strategy
- Doubles Strategy
- Near Doubles Strategy
- Ten Plus Strategy
- Make a Ten Strategy
-Related Facts Strategy
- Think Addition Strategy
-Build Up Through Ten Strategy
oBack Down Through Ten Strategy
- Doubles Memory Match (Concentration) Cards- Match the number sentence to the sum.
- Ten Frames 11-20 Memory Match (Concentration) Cards- Match the numeral to the ten frame

1

## one

$$
2 \text { two }
$$

three

4 four

## seven

 ten

twenty

19
nineteen

18 eighteen

17
seventeen

16 sixteen

15 fifteen

14
$f$ ourteen

| - | 0 | 0 | 0 | 0 |
| :--- | :--- | :--- | :--- | :--- |

| - | 0 | 0 | 0 | 0 |

11
eleven

# Zero Strategy When one of the addends is 0 

$$
5+0=
$$

## One More Strategy

When one of the addends is 1 , you count on
1 more.
$8+1=$

|  |
| :---: |

$+$

| 禁 |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |

0

| 1 | 2 | 3 | 4 | 5 |
| :--- | :--- | :--- | :--- | :--- |

## Two More Strategy

When one of the addends is 2 , you count on
2 more.
$6+2=$

0

## Sums of 10

## Any two addends that equal 10

$$
7+3=
$$

| 集 | 㴆 |
| :---: | :---: |
| 䛓 | 㴆 |
| 兴 |  |
| 兴 |  |
| 举 |  |

$+$|  |  |
| :--- | :--- |
|  |  |
|  |  |
|  |  |
|  |  |

| 鉴 | 潫 |
| :---: | :---: |
| 㴆 | 潫 |
| 渻 | ， |
| 㴆 | O |
| 㴆 | O |

# Doubles Strategy 

 When the two addends are the same$$
3+3=
$$

| $\square$ |  |
| :--- | :--- |
| $\square$ |  |
| $\square$ |  |
|  |  |
|  |  |

|  | $\square$ |  |
| :--- | :--- | :--- |
|  | $\square$ |  |
|  | $\square$ |  |
|  |  |  |
|  |  |  |

## Near Doubles Strategy

When one addend is 1 more or 1 less than the other

$$
3+4=
$$

## Ten Plus Strategy

 When one of the addends is 10$$
10+3=13
$$

## Make a 10 Strategy

Use when one of the addends is a 7,8 ，or 9 ． Make a 10 first，see how many you have left，and add．

$$
8+5=\longrightarrow 10+3=13
$$

| $+$ | ＋ |  | 渻 |  |
| :---: | :---: | :---: | :---: | :---: |
| $+$ | ＋ |  | 渻 |  |
| $+$ | $+$ | ＋ | 渻 |  |
| $+$ |  |  | $\cdots$ |  |
| $+$ |  |  | $\pm$ |  |

$=$| $t+$ |
| :--- |
| $t+t$ |
| $t+$ |
| $t$ |
| $t$ |

| 漁 |
| :---: |
| 㴆 |
| 㴆 |
|  |
|  |

## Related Fact Strategy

The order of the addends does not change the sum. The sum is the same.
$3+2=5$

## Think Addition

Use an addition fact to help you solve a subtraction problem.

$$
10-8=?
$$

Think $8+2=10$, so $10-8=2$

## Build Up Through 10

This strategy is used for subtraction facts with -8 or -9 .
Instead of subtracting, build up starting with 8 or 9.

$$
15-9=
$$

You need 1 more to make the 9 a 10, and then you need 5 more to get to $15.1+5=6$, so $15-9=6$

## Back Down Through 10

This strategy is used when one addend is larger than 10.

$$
14-6=
$$

Start with 14 and then take away 4 to make 10.

| You have 10. <br> Take away 2 more. <br> (Now you have taken <br> away a total of 6) <br> How many do you have <br> left? |  |  |
| :---: | :---: | :---: |
|  |  |  |

## Doubles Memory Match (Concentration)

-Cut the cards apart (laminate for durability)
-Place face down on a table or carpet
-Students can play on teams or individually
-Students will take turns turning two cards over at a time.
-If a student makes a match then they get to keep the cards and go again.
-If a student does not make a match then the two cards are turned back over and another student takes a turn.
-Keep playing until all cards have been matched.

Memory Match for Numbers 10-20 (Match the numeral to the ten frame)
